SURFACE PREPARATION

No preparation required.

SUGGESTED PRIMER

No primer required.

APPLICATION

Stir thoroughly before application. Should the paint be too thick when it's applied with a spray gun, it is recommended to dilute with a maximum of 10% water.

According to the required pigmentation by the applicator, an additional dilution could be made while keeping in mind that a higher dilution may cause the paint to fade quicker after a rainfall, and can dry to be paler.

The paint will then dry to a whiter finish.

WARRANTY

This product will give full satisfaction if applied according to the manufacturer's instructions. Manufacturer's liability is limited to the replacement of the product and does not include manpower if found defective upon inspection.

CAUTION

- Keep away from children's reach
- Keep in a dry area between 10° C-30° C
