PRODUCT IDENTIFIER – 4899 DATE & VERSION – MAY 17, 2017 VERSION 01

Section 5. Fire-fighting measures

Specific hazards of the hazardous product (hazardous combustion products)

Carbon oxides and other irritant/toxic gases and fumes.

Suitable and unsuitable extinguishing media

In case of fire: Use carbon dioxide, chemical powder agent and appropriate foam to extinguish.

Special protective equipment and precautions for fire-fighters

During a fire, irritating/toxic smoke and fumes may be generated. Do not enter fire area without proper protection. Firefighters should wear proper protective equipment and self-contained breathing apparatus with full facepiece. Shield personnel to protect from venting, rupturing or bursting cans. Move containers from fire area if it can be done without risk. Water spray may be useful in cooling equipment and cans exposed to heat and flame.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with clean-up should wear the appropriate protective equipment (See Section 8).

Methods and materials for containment and cleaning up

Ventilate area of release. Stop the leak if it can be done safely. Contain and absorb any spilled liquid concentrate with inert absorbent material, then place material into a container for later disposal (see Section 13). Contaminated absorbent material may pose the same hazards as the spilled product. Notify the appropriate authorities as required.

Section 7. Handling and storage

Precautions for safe handling

Wear gloves/protective clothing/eye protection/face protection.

Before handling, it is very important that engineering controls are operating, and that protective equipment requirements and personal hygiene measures are being followed. People working with this chemical should be properly trained regarding its hazards and its safe use. Inspect containers for leaks before handling. Label containers appropriately. Ensure proper ventilation. Avoid breathing dust/fume/gas/mist/vapours/spray. Avoid contact with eyes, skin and clothing. Keep away from heat, sparks and flame. Avoid generating high concentrations of dusts, vapours or mists. Keep away from incompatible materials (Section 10). Keep containers closed when not in use. Empty containers are always dangerous. Refer also to Section 8.

Conditions for safe storage, including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed. Keep cool. Store locked up. Store away from incompatible materials (Section 10). Inspect all incoming containers to make sure they are properly labelled and not damaged. Storage area should be clearly identified, clear of obstruction and accessible only to trained personnel. Inspect periodically for damage or leaks.

Section 8. Exposure controls/Personal protection

Control parameters (biological limit values or exposure limit values and source of those values) Exposure limits: CAS 540-88-5 ACGIH – TLV-TWA --- & PEL-TWA 200 ppm; CAS 1330-20-7 ACGIH – TLV-TWA 100 ppm (STEL 150 ppm) & PEL-TWA 100 ppm; CAS 14807-96-6 ACGIH – TLV-TWA 2 mg/m³; CAS 1333-86-4 – ACGIH – TLV-TWA 3 mg/m³& PEL-TWA 3.5 mg/m³; CAS 100-41-4 ACGIH – TLV-TWA 20 ppm & PEL-TWA 100 ppm;

Appropriate engineering controls

Use under well-ventilated conditions. Local exhaust ventilation system is recommended to maintain concentrations of contaminants below exposure limits. Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

Individual protection measures/personal protective equipment

Respiratory protection is required if the concentrations are higher than the exposure limits. Use a NIOSH approved respirators if the exposure limits are unknown. Chemically protective gloves (impervious), and other protective clothing to prevent prolonged or repeated skin contact, must be worn during all handling operations. Wear protective chemical splash goggles to prevent mists from entering the eyes. Wash hands/nails/face thoroughly after handling. Do not eat, drink or smoke when using this product. Practice good personal hygiene after using this material. Remove and wash contaminated work clothing before re-use.

Section 9. Physical and chemical properties				
Appearance, physical state/colour Liquid	Vapour pressure Not available			
Odour Characteristic	Vapour density Not available			
Odour threshold Not available	Relative density 1.05-1.20			
pH Not available	Solubility Miscible			
Melting/freezing point -62°C	Partition coefficient - n-octanol/water Not available			
Initial boiling point/range 98°C	Auto-ignition temperature Not available			
Flash point 4.4°C	Decomposition temperature Not available			
Evaporation rate Not available	Viscosity Not available			
Flammability (solids and gases) Not available	VOC Not available			
Upper and lower flammability/explosive limits 1.2-6%	Other None known			

Section 10. Stability and reactivity

	Section 10. Stability and reactivity
Reactivity	
Does not react under the recommended storage and	handling conditions prescribed.
Chemical stability	
Stable under the recommended storage and handlin	ng conditions prescribed.
Possibility of hazardous reactions	
	flames and other ignition sources. No smoking. Take action to prevent static discharges.
Conditions to avoid (static discharge, shock or	
	flames and other ignition sources. No smoking. Take action to prevent static discharges.
Incompatible materials	numes and other remains sources. The smoking. Take action to prevent state disentarges.
Oxidizing materials; etc.	
Hazardous decomposition products	
None known	
	Section 11 Terricological information
	Section 11. Toxicological information
Information on the likely routes of exposure (in	
	uses skin irritation. Causes serious eye irritation. Suspected of causing cancer.
Symptoms related to the physical, chemical an	
	itation, redness, tearing; Respiratory tract irritation, coughing, shortness of breath, dizziness,
drowsiness, nausea and headaches.	
Delayed and immediate effects (chronic effects	from short-term and long-term exposure)
	ry Sensitization – No data available; Germ Cell Mutagenicity – No data available; Carcinogenicity
	HA; Reproductive Toxicity – No data available; Specific Target Organ Toxicity — Single Exposure
	ity - Repeated Exposure - No data available; Aspiration Hazard - Possible; Health Hazards Not
Otherwise Classified – No data available.	
Numerical measures of toxicity (ATE; LD50 &	
CAS 1330-20-7 Oral, rat LD ₅₀ 4300 mg/kg; Derr	nal, rabbit LD ₅₀ 12100 mg/kg; CAS 64742-95-6 Oral, rat LD ₅₀ 8400 mg/kg; CAS 100-41-4 Oral,
rat LD50 3500 mg/kg; Dermal, rabbit LD50 15380	mg/kg;
ATE not available in this document.	
	Section 12. Ecological information
Ecotoxicity (aquatic and terrestrial informatio	
Persistence and degradability No data av	
Bioaccumulative potential No data availab	
Mobility in soil No data available	
Other adverse effects No data available	
other adverse effects 140 data available	Section 13. Disposal considerations
Information on sofe handling for disposed/met	
Information on safe handling for disposal/met	
Dispose of contents/container into sale container	in accordance with local, regional or national regulations.
	Section 14. Transport information
UN number; Proper shipping name; Class(es);	
UN1263; PAINT RELATED MATERIAL; CLA	
UN number; Proper shipping name; Class(es);	
UN1263; PAINT RELATED MATERIAL; CLA	SS 3; PG II
UN number; Proper shipping name; Class(es);	Packing group (PG) of the IATA (air)
UN1263; PAINT RELATED MATERIAL; CLA	SS 3; PG II
Special precautions (transport/conveyance)	May also be shipped as a LIMITED QUANTITY in accordance with TDG.
Environmental hazards (IMDG or other)	None
Bulk transport (usually more than 450 L in ca	pacity) Possible
	Section 15. Regulatory information
Safety/health Canadian regulations specifics	Refer to Section 2 for the appropriate classification. This product has been classified in accordance
Survey, neuron Canadian regulations specifies	with the hazard criteria of the Hazardous Products Regulations (HPR).
Environmental Canadian regulations specifics	
Safety/health/environmental outside regulation	
United States OSHA information: This product is	
	gency) information: 40 CFR Refer to the ingredients listed in Section 3 & Sections 12; 13 & 14.
United States TCSA information: Refer to the ing	
Camornia Proposition 65: This product contains an	n ingredient known to the State of California to cause cancer or other reproductive harm.
