Colour of the year

Simple Serenity

0614 SIMPLE SERENITY

Nominated **colour of the year** by our team of experts, Simple Serenity can be used with flair in every room of the house from the basement to the attic. It is said of this shade that it awakens hope and calm tensions. If at first glance, this delicate blue gives off a lot of softness, you will notice that it can still add punch to a decor that is meant to be more vibrant.

It is used in perfect harmony from the nursery to the master bedroom. It's not surprising that this colour has the power to appease. Especially when the shade has a velvet touch like Simple Serenity.
